

Phantom™ HALR™

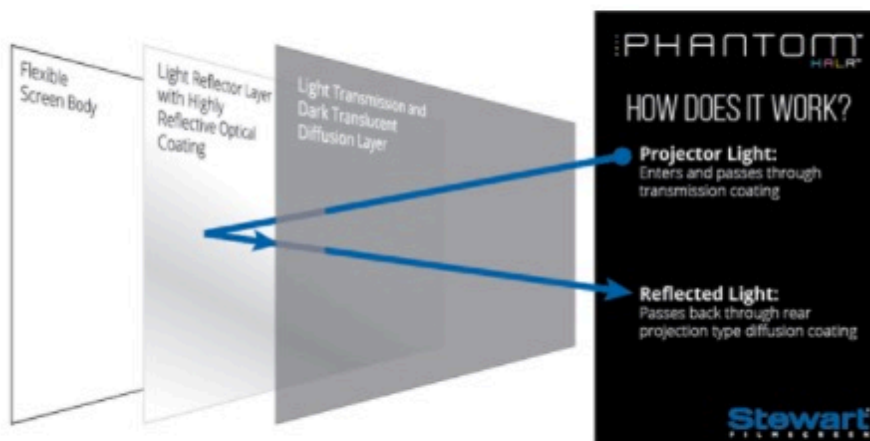

16K+
RESOLUTION
SINCE 1967

2018
BEST SHOW
WINNER

A new, flexible front projection high ambient light rejection screen material, Phantom™ HALR™ offers excellent ambient light rejection capabilities that deliver an exceptional entertainment experience, day or night.

Unlike other manufacturers' offerings, Phantom™ HALR™ is available in any image size up to 40 feet by 90 feet, seamlessly. It is the only black screen on the market that can be perforated for acoustical transparency, which includes Stewart's exclusive Microperf X² THX-Ultra or Cinemaparf options depending on the size of the screen. For installation versatility, Phantom™ HALR™ can be configured with any of Stewart's ElectriScreen models or as a fixed frame.

Future-proofed with 16K+ resolution, Phantom™ HALR™ is not susceptible to color shift. It will calibrate out to REC 2020 or REC 709 without obvious color aberrations that skew the primary and secondary colors. A stunning solution, Phantom™ HALR™ black screen will provide the image uniformity and fidelity in any high ambient light application.

Material Type	front_projection
Maximum Size	40' x 90' Seamless
Peak Gain	1.0
Half Gain	30 Degrees
